

FLOOR PROFILE

Alumunium Profile

Lightronic

Product Description

The Lightronic Floor Profile is a versatile lighting solution designed for both indoor and outdoor linear floor lighting applications. It features an anodized aluminum alloy construction for durability, with a PMMA opal diffuser that ensures smooth light distribution. The profile is available in a silver grey color and comes in lengths of 2mtr/3mtr. It is compatible with 10mm striplights and can be cut to fit specific requirements. The mounting type is flexible, allowing for both surface and recessed installations. The product is certified with IK08, ROHS, IP65, and CE standards, ensuring its quality and safety. Accessories include end caps with and without holes, as well as metal mounting clips for easy installation.
