

Product Description

This is a compact and functional recessed hexa spotlight, designed for targeted illumination with a discreet profile. The fixture features a rectangular body that is intended to be concealed within the ceiling, leaving only a minimalist, white faceplate visible. The most prominent feature of the visible faceplate are two circular, deeply set light apertures, each housing an independent spotlight. This dual-light design allows for versatile directional control, enabling users to illuminate two distinct areas or create broader coverage with precise focus. The deep-set nature of the light sources helps to minimize glare, contributing to visual comfort. The fixture also shows robust spring clips for secure installation into the ceiling.

Light

Light Source	: Smalite Led Chip
Wattage	: 18W
Beam Angle	: 10° 24° 36°
CCT	: 2700K 3000K 4000K 5000K
CRI	: >90

Body

Color	: Black
Material	: Die Cast Aluminum
Length	: 185 mm
Width	: 35 mm
Height	: 52.8mm

Electric

Input Voltage	: AC 220-240V
Fixture Lumen	: 1260lm
System Efficiency	: 70lm/W

Other

Protection	: IP20
