

Product Description

It's a modern pendant light with a sleek, cylindrical design. It's crafted from "Metal & Acrylic," featuring a frosted or translucent acrylic diffuser that encases the light source, likely an integrated LED, and is capped with metallic elements on both ends, possibly in a brass or gold finish. The dimensions are 11cm in diameter and 38cm in fixture height, operating on 220/240V. Its design suggests a clean, contemporary aesthetic perfect for accent lighting over kitchen islands, dining tables, or in modern living spaces.
