

## Product Description :

This is a modern, linear chandelier featuring a sleek, minimalist design. It consists of a black rectangular canopy from which two slender rods descend, suspending a single horizontal light bar. The light bar appears to be an integrated LED, emitting a continuous, even glow. The suspension points are accentuated by small, conical elements, adding a subtle decorative touch to the otherwise utilitarian structure. The overall aesthetic suggests it would be well-suited for contemporary interiors, particularly over dining tables, kitchen islands, or in commercial spaces.

### Lamp

Light Source : LED

Average Life (hrs) : 20000hrs

### Electric

Voltage : 220-240V,50/60Hz
