

Product Description

This RGBWW LED strip is engineered to provide high-quality illumination with a versatile range of color temperatures from 2400K to 6000K. We designed it to operate efficiently at DC24V, delivering a balanced output across various colors, including dedicated red, green, and blue channels. With a high density of 60 LEDs per meter and a consistent 12mm spacing, the strip ensures a smooth and uniform light distribution for any application. The compact 12mm width and 100mm cut points allow for precise installation, while the IP20 rating makes it an ideal choice for protected indoor environments. To give you full control over the ambiance, we offer multiple dimming options, including Triac, 0/1-10V, and Dali compatibility.

Lamp

Power	: 19.2W/M
CRI	: 80
Rated Life	: 30,000 HRs
CCT	: RGB+(2400K 2700K 3000K 4000K 6000K)
Led Qty	: 60LEDs/M

Electric

Voltage	: DC24V
